NATIONAL

SAVINGS

CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in the Provinces of India and some of the Indian States for the week ending the 25th June 1949.

REMARKS

The figures of births and deaths shown in this statement for week the ending the 25th June 1949, relate to 168 towns with an estimated population of 20,713 thousands. The total number of towns is 213 and their population is 25,943 thousands. Thus 79% of the total number of towns representing 80% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 11,779 and 7,677 representing birth and death rates of 29·6 and 19·3 per thousand of the population respectively.

(A) *Indian Provinces*.—The data here relate to 155 towns with an estimated population of 19,062 thousands. The total number of towns is 189 and their population is 23,320 thousands. Thus 82% of the total number of towns representing 82% of the total population is covered. The number of births and deaths recorded in these towns were 11,022 and 7,113 representing birth and death rates of 30·1 and 19·4 per thousand of the population respectively. The table

at the end gives the position by provinces :—

The towns of Pilibhit, Banaras and Hathras in U. P. recorded high death rates of 60·2, 56·5 and 52·0 per thousand of the population respectively. In Banaras and Hathras, the high death rates were mainly due to deaths from fevers. None of the specified causes seems to be responsible for the high death rate in Pilibhit.

(B) *Unions and States*.—The data here relate to 13 towns with an estimated population of 1,651 thousands. The total number of towns is 24 and their population is 2,623 thousands. Thus 54% of the total number of towns representing 63% of their total population is covered. The number of births and deaths recorded in these towns were 757 and 564 representing birth and death rates of 23·8 and 17·8 per thousand of the population respectively. No town recorded a high death rate of 50 or over per thousand of the population.
